

Everything you need to extend and customize MicroStation®, Bentley vertical applications, and Bentley collaboration servers to create world-class AEC solutions.

The **Bentley Developer Network** provides third party and Bentley SELECT® developers with resources to create value-added solutions based on Bentley's platform and vertical products. The Bentley Developer Network offers convenient access to information, development tools, technical support, and programming resources to expand your development options, help you work more efficiently, and reduce your cost of development.

Bentley Developer Network Partners extend and enhance Bentley software by delivering applications that embed, complement, and interoperate with or otherwise add value to Bentley software solutions.

The Bentley Developer Network - A Bentley Alliance Program

The Bentley Developer Network is part of the Bentley Alliance Program. The goal of the Bentley Alliance Program is to develop strong relationships with key industry, technology, solution and implementation partners so Bentley Alliance Partners will be successful in developing, promoting, marketing, and selling their services, products, and solutions.

For more information, visit www.bentley.com/developer.

"With the MicroStation platform, opportunities for innovation are practically limitless.

Almost everything we do in MicroStation V8 is exposed through a programming layer —MDL®, Visual C or Visual Basic for Applications. The Bentley Developer Network supplements those standard tools with an additional range of APIs specifically for subscribers. The Bentley Developer Network is an outstanding resource for users and third parties to extend and customize MicroStation, Bentley V8 applications and Bentley collaboration servers to create world-class AEC solutions."

**- Keith Bentley
Co-Chief Technology Officer
Bentley Systems, Incorporated**

Program Benefits

Software

MicroStation and Vertical Applications - Access to the latest version of Bentley products (including Betas, WIPs, RCs, and commercial versions) through the Web or on customized CD.

Collaboration Servers - The latest version of Bentley content management and content publishing servers available through the Web or on customized CD.

Network License - Ability to concurrently use Bentley software development licenses across networked users at your development site.

Application Programming Interfaces (APIs)* - A range of APIs supplement standard product development tools, available only to Bentley Developer Network members.

Software Development Kits (SDKs)* - Include the APIs, sample code, and API documentation, as well as necessary libraries and support files.

MySELECT CD - Customize a CD with the developer tools you need to use.

Technical Support & Training

Bentley DeveloperWare - Hundreds of source code samples and thousands of solutions to common development challenges.

Developer Support - Code-level technical support from Bentley developer support engineers via E-mail and phone.

Developer Discussion Groups - Public and private forums for developers to discuss Bentley technologies with other developers and Bentley personnel.

Developer Workshops and Labs - Hands-on experience and insights into issues relevant to getting your existing application code to the latest versions of Bentley products, as well as APIs, in either a classroom or lab environment. The workshops are conducted at Bentley's corporate headquarters in the United States (Exton, PA) and Bentley's International Headquarters (Hoofddorp, The Netherlands).

Bentley Institute Training Courses - The Bentley Institute manages professional training programs that significantly and measurably enhance productivity of architectural, engineering, construction, and operations professionals around the world. The Bentley Institute offers courses that are exclusive to developers.

News, Information, and Reference Material

Online Developer Information - Anytime, anywhere online access to a wide variety of critical technical information and interactive support tools.

BDNzine - Bentley's bimonthly E-mail newsletter with the latest developer-related news, information, and programming articles.

BDNonline Developer Sessions. Members have access to regularly scheduled online sessions hosted by Bentley programmers and software development executives.

Events

Bentley Developer Conference - Annual conference dedicated to third-party developers. Learn about the latest development tools. Share insight and network with other developers. Provide feedback to key Bentley programmers.

Bentley International User Conference - This highly anticipated annual event provides users with access to the latest training and technology, and features keynotes and insights from prestigious industry speakers. The conference provides a great opportunity for members to demonstrate their offerings and network with users that they otherwise might not be able to.

Marketing and Business Development

Bentley Co-marketing Programs - Developers may participate in a wide variety of co-marketing programs to get their products in front of Bentley users.

Bentley Developer Marketing Event Discounts - Programs range from advertising discounts and discounts for exhibiting at Bentley user events, like the Bentley International User Conference and Bentley FORUMS.

Bentley Developer Online Catalog - **COMING SOON!** - An online catalog of the applications you are developing on Bentley products, making your products visible on www.bentley.com.

* Certain APIs/SDKs may have training and/or consulting prerequisites.
