

## SELECT<sup>SM</sup> Developer Program

Part of the Bentley Developer Network, The **SELECT Developer Program** is available to Bentley SELECT<sup>®</sup> subscribers interested in in-house customization, integration, and development of MicroStation<sup>®</sup>, discipline-specific applications or collaboration servers.

### Program Benefits

#### Software

- 1. Application Programming Interfaces (APIs)\*.** Bentley offers a range of APIs that supplement standard product development tools, available only to Bentley Developer Network members.
- 2. Software Development Kits (SDKs)\*.** SDKs include the APIs, sample code and API documentation, as well as necessary libraries and support files.

#### Technical Support & Training

- 1. Developer Technical Support.** Code-level technical support from Bentley developer support engineers via E-mail and phone.
- 2. Developer Newsgroup.** Public and private forums for developers to discuss Bentley technologies.

#### News, Information, and Reference Material

- 1. Developer Information Online.** Anytime, anywhere online access to a wide variety of critical technical information and interactive support tools.
- 2. Bentley Developer News.** – **COMING SOON!** – Bentley's monthly E-mail newsletter with the latest developer-related news and information.
- 3. Online Sessions.** Subscribers have access to Developer Online Sessions hosted by Bentley programmers and software development executives.
- 4. Developer Workshops.** Hands-on experience with insights on issues relevant to porting your existing application code to the latest versions of Bentley products, as well as application programming interfaces, in either a classroom or lab environment. The workshops are conducted at Bentley's corporate headquarters in the United States (Exton, PA) and Bentley's International Headquarters (Hoofddorp, The Netherlands).

#### Events

**Bentley Developer Conference.** This annual "must-attend" conference for all Bentley Developer Network members gives SELECT developers the opportunity to learn about the latest development tools, share insight and network with other developers, and provide feedback to key Bentley programmers and developers.

\* Certain APIs/SDKs may have training and/or consulting pre-requisites.
